SETTLEMENT LEVEL SITUATION ANALYSIS

**VALENICINA (LAMI), CAUBATI KORO (NASINU), NAWIJKUMA (NADI),
TOMUKA (LAUTOKA), TAUVEGAVEGA (BA) AND BABA (LEVUKA)**

Methodology

- **Primary data collection:**

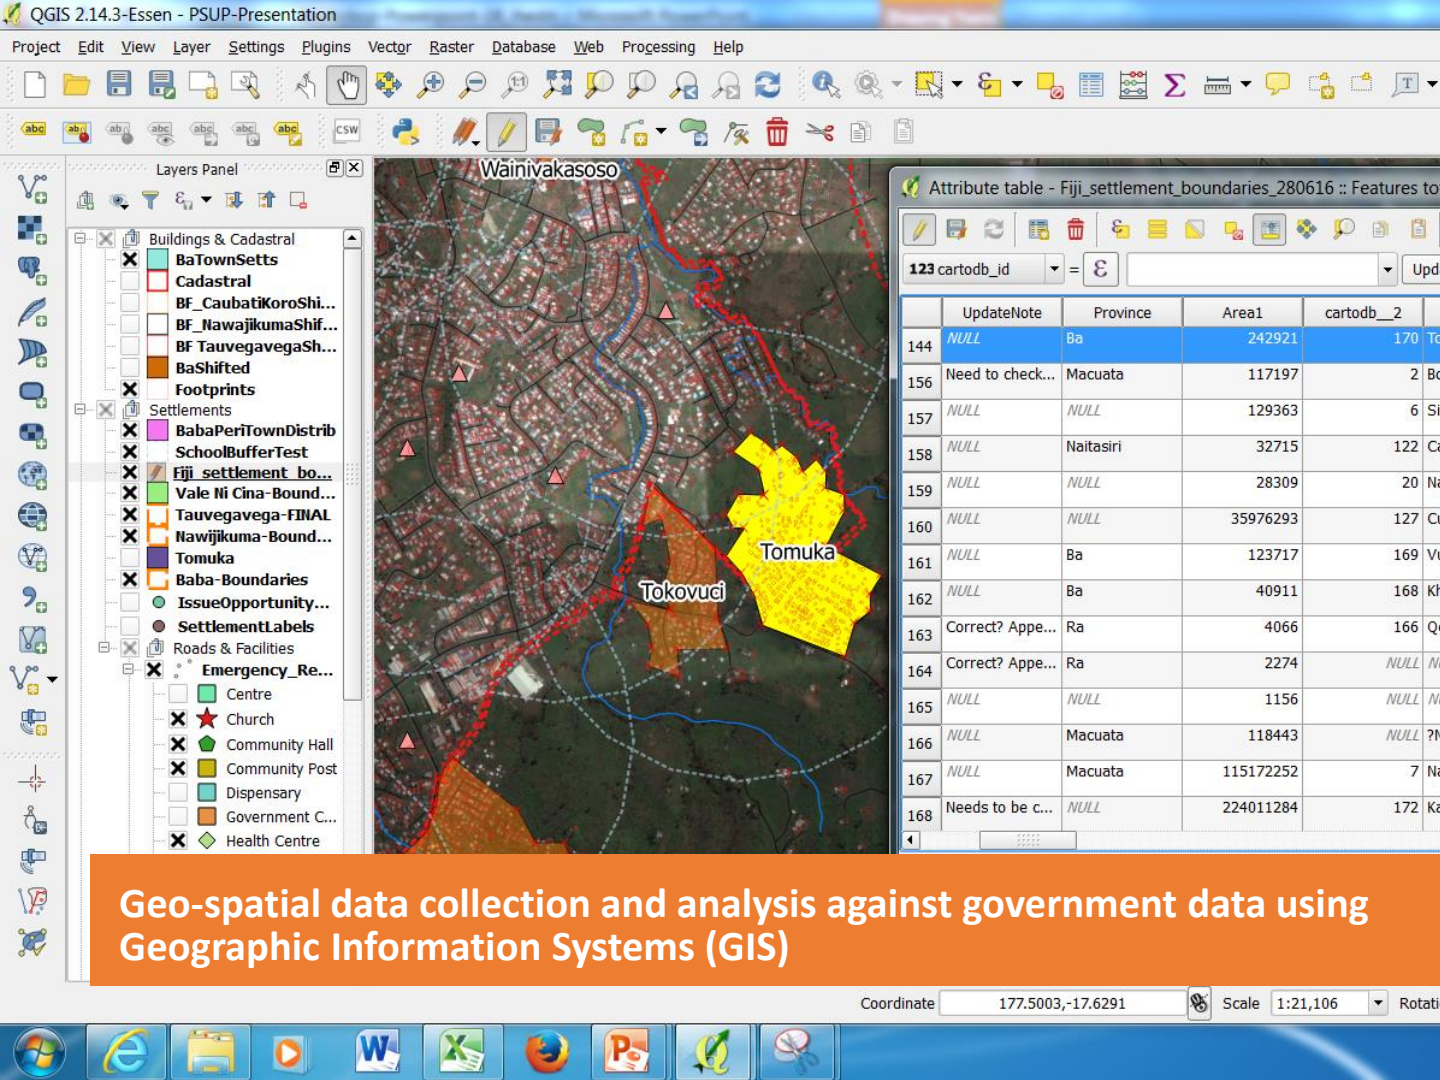

- Six focus settlements in six cities/towns
- Socio-economic household surveys
- Community mapping sessions
- In-depth interviews
- Site observation surveys
- Discussions with field workers
- Identification of settlement boundaries using GPS

- **Secondary data analysis:**

- FBoS census analysis
- Geo-spatial analysis using GIS
- Literature & document review
- City/town settlement boundaries making use of satellite photos, local knowledge and a proportion of ground truthing

- **Analysis and assessment:**

- Desktop analysis of findings using key planning frameworks

Settlement Selection

- Settlement typologies appeared consistent with the city's settlement examples
- Willingness of partners to potentially work in these settlements
- Sites weren't extreme relocation cases
 - Not hazardous, dangerous or environmentally challenged areas
- Possibility for water & sanitation to be addressed
- Proportion of security of tenure for residents

Baba Settlement

Location: Levuka, town and peri-urban. State and native land.

Land area:
13.6 hectares

Population: 579,
42.7 persons/hectare

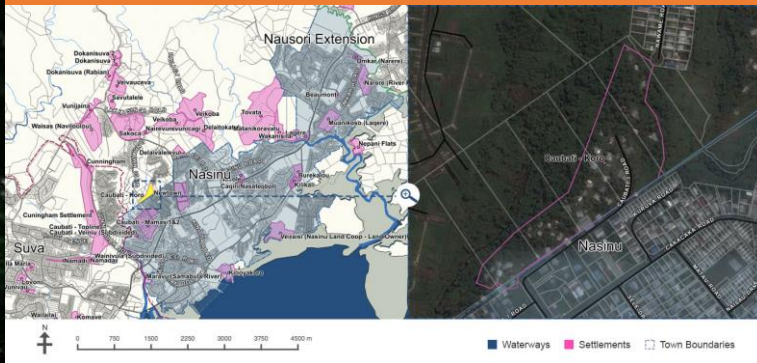

Dwellings: 115

Caubati Koro Settlement

Location: Nasinu peri-urban,
Suva. native land.

Land area: 4.0
hectares

Population: 317
78.4 persons/ hectare

Dwellings: 54

TURAGA NUKO

Tauvegavega Settlement

Location: Ba peri-urban area.

Native land transferred to MLGHEIT

Land area: 34.3 hectares

Population: 1,140 (33.2 persons per hectare)

Dwellings: 307

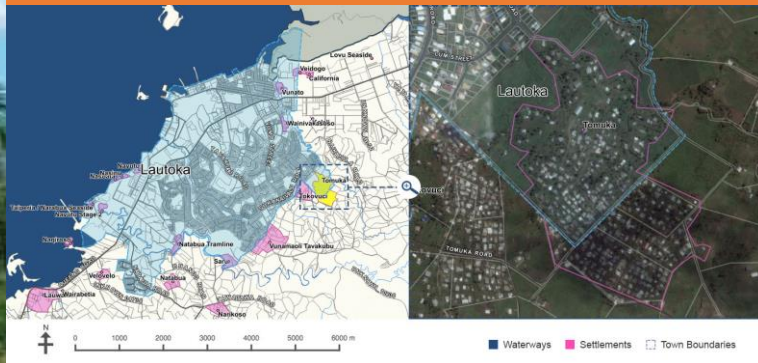

Tomuka Settlement

Location: Lautoka town and peri-urban area. Native land.

Land area: 24.4 hectares

Population: 2300 (93.3 persons per hectare)

Dwellings: 476

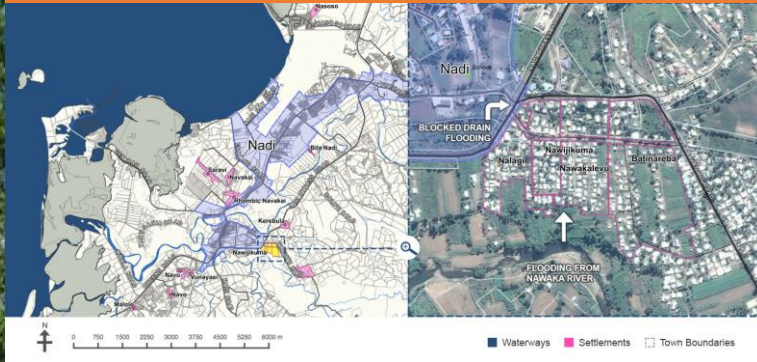

Nawijikuma Settlement

Location: Nadi, peri-urban.
Native land.

Land area: 14.5
hectares

Population: 700
22 persons/hectare

Dwellings: 153

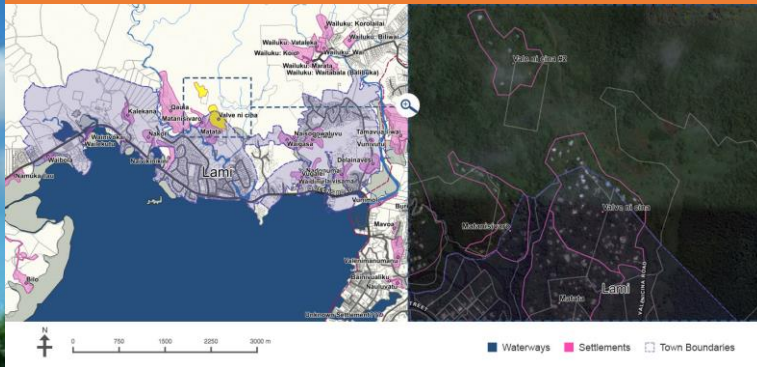

Valenicina Settlement

Location: Lami, peri-urban.
Native land.

Land area: 10.6
hectares

Population: 721
68.1 persons/hectare

Dwellings: 106

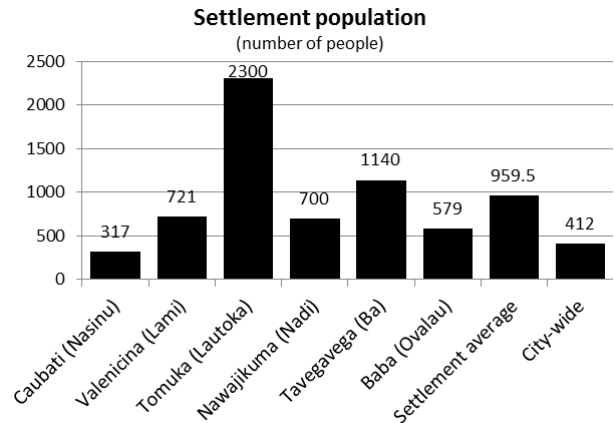

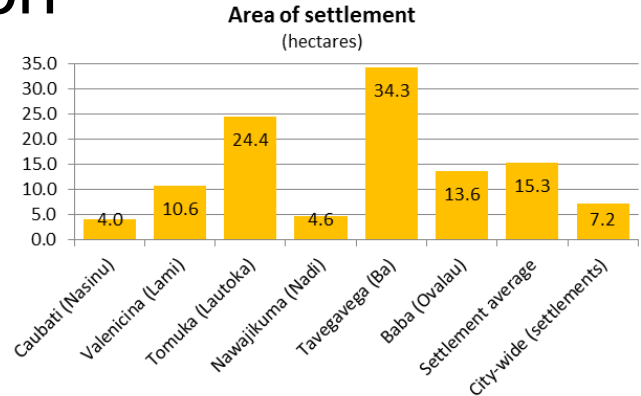

Land and Population

Settlement Size

- 6 Sett. Area average = 15 hectares
- Citywide average = 7.2 hectares

Settlement Population

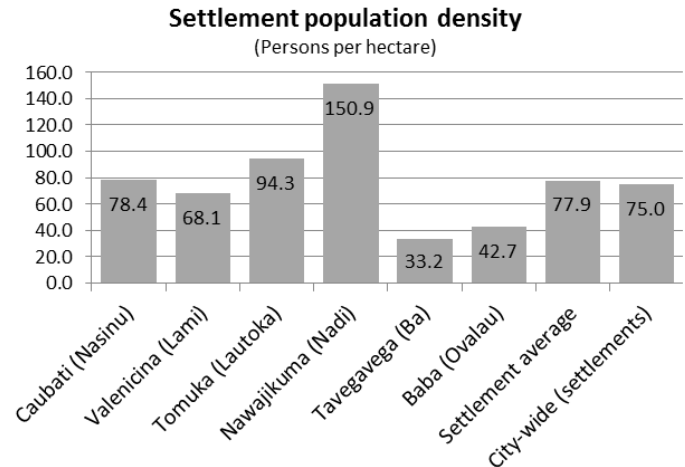

- 6 Sett. population average = 960
- Citywide average = 412
- Tomuka & Tauvegavega we're the largest settlements in size & population (however, population density was lower in Tauvegavega)

Land and Population

Population Density

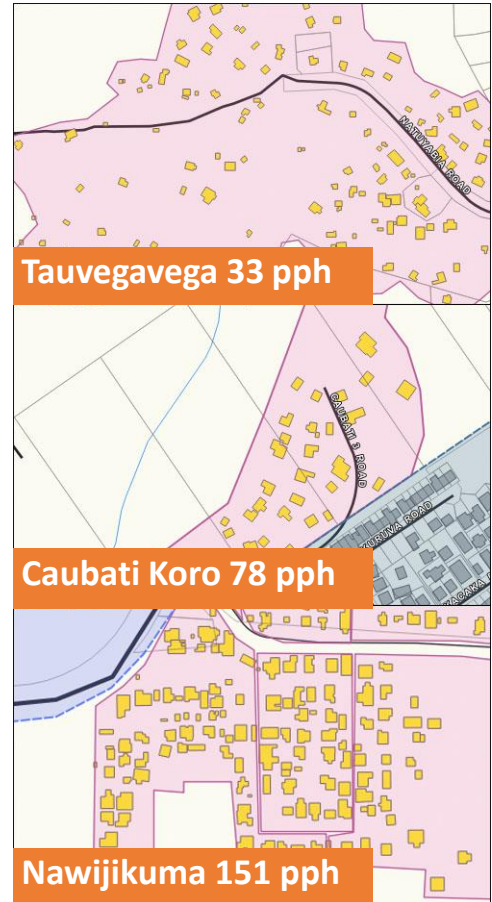

- 6 Sett. Area average = 78 pph
- Citywide average = 75 pph
- Nawakijuma highest at 151 pph (double citywide and focus settlement average)
- Caubati Koro, similar to the citywide settlement average for total population & population density (317 population & 78 pph)

Land and Population

Population Density

- 6 Sett. Area average = 78 pph
- Citywide average = 75 pph
- Nawakijuma highest at 151 pph (double citywide and focus settlement average)
- Caubati Koro, similar to the citywide settlement average for total population & population density (317 population & 78 pph)

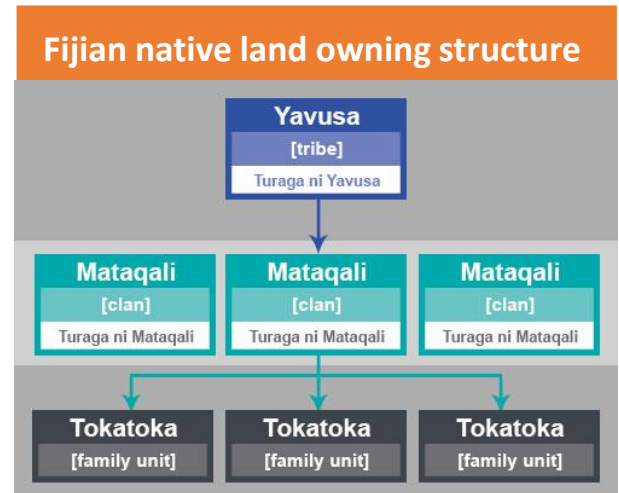

Land, Tenure and Community Governance

Settlements and land ownership

- Four of the six settlements had complex ownership, tenure and location characteristics
- Caubati Koro & Valenicina we're in a single location and had a single land owner

Tenure

- All settlements were on native land
- Most had started to take some steps toward securing tenure
- Ministry of Local Government had taken out a head lease in Tauvegavega

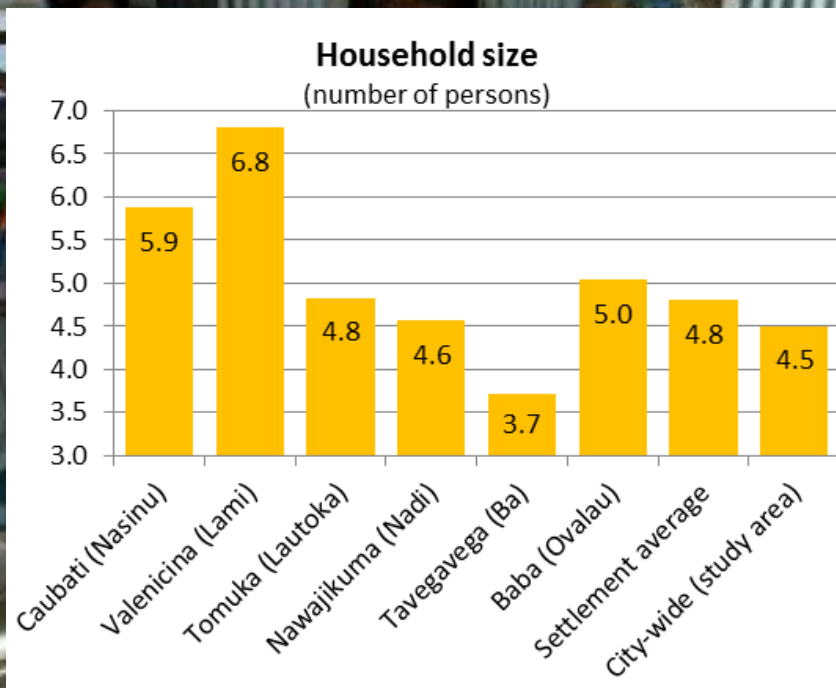

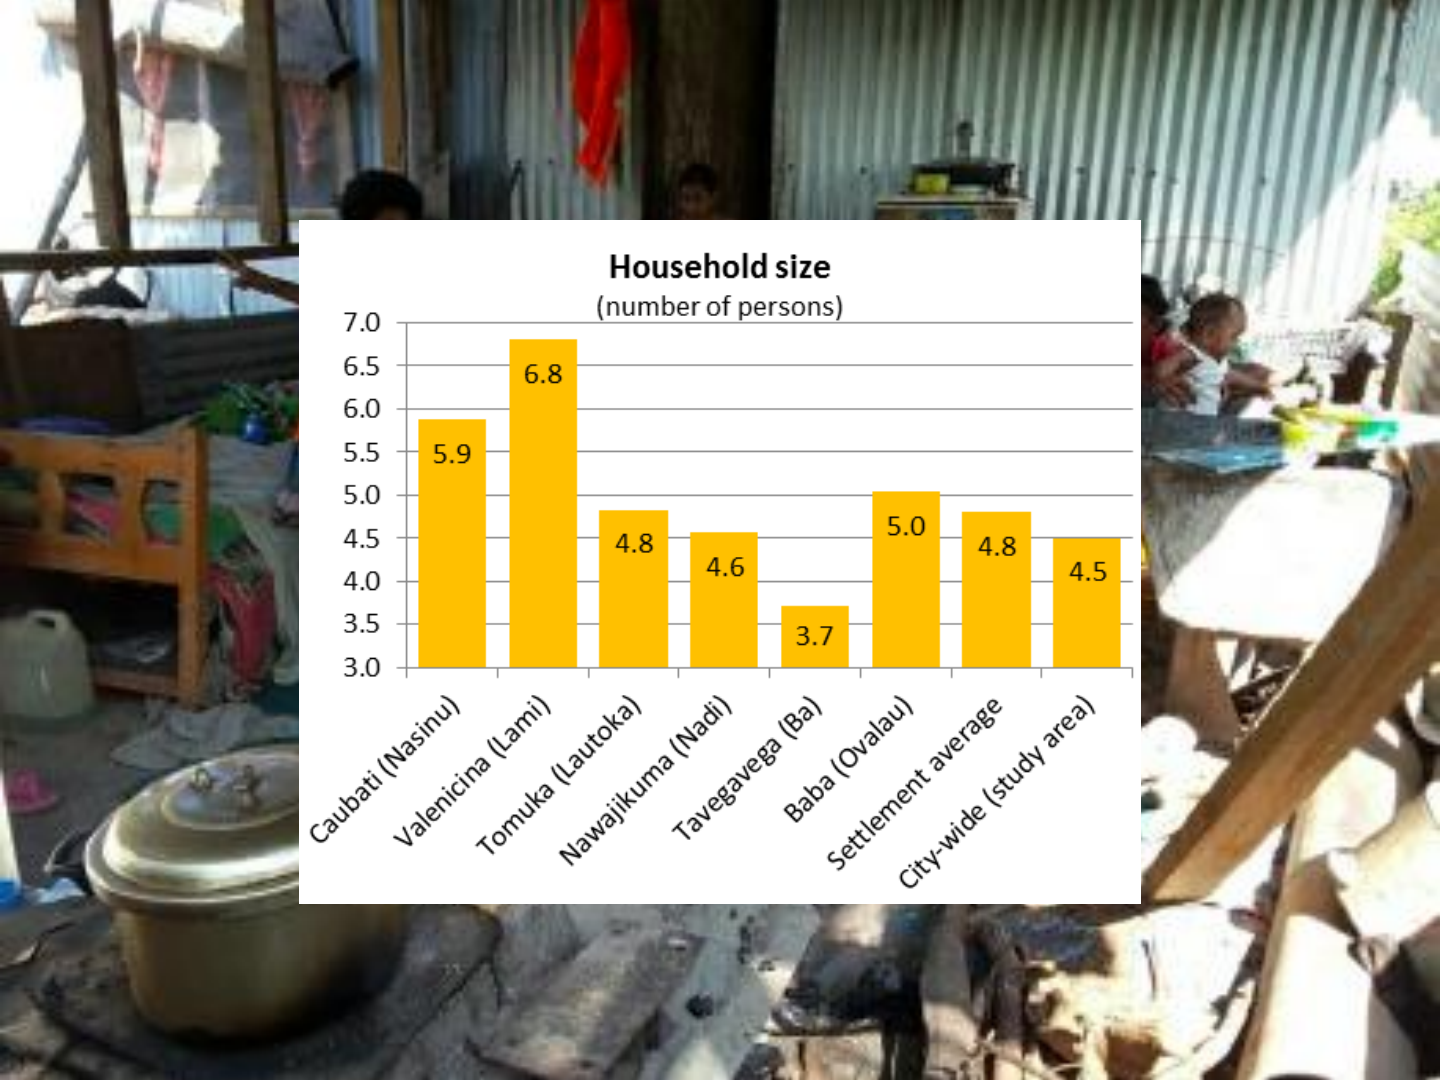

Land, Tenure and Community Governance

Community organisation

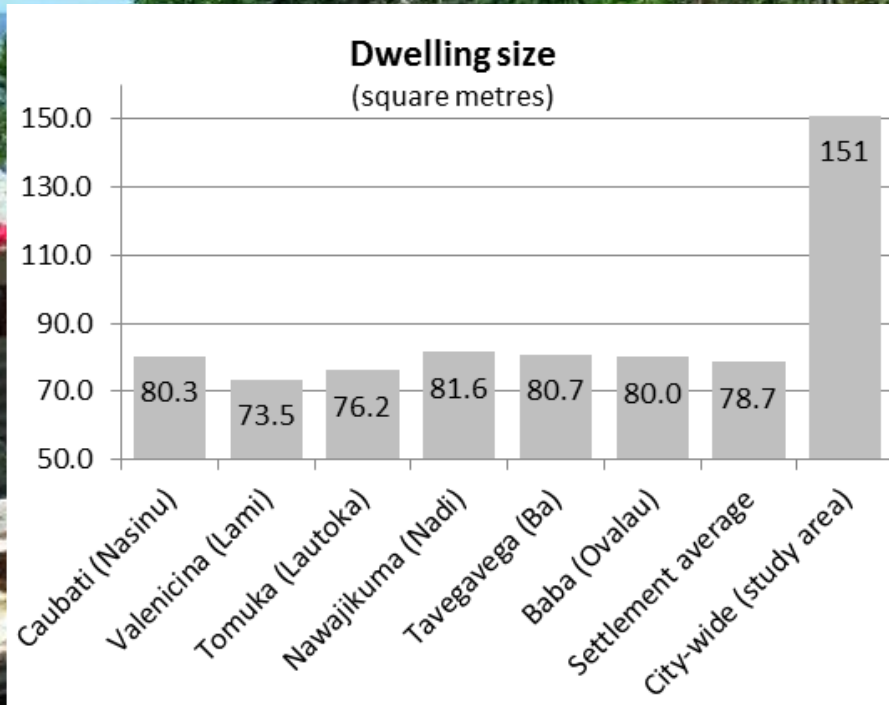

- Most settlements had some form of committee either operation or in dormancy.
- Most had a community leader/coordinator
- Many also had an advisory councilor
- (for a breakdown refer to Appendix B.2 in report)

Other structures. There we're a range of other groups and affiliations that structure community governance for example through church, clan affiliation.

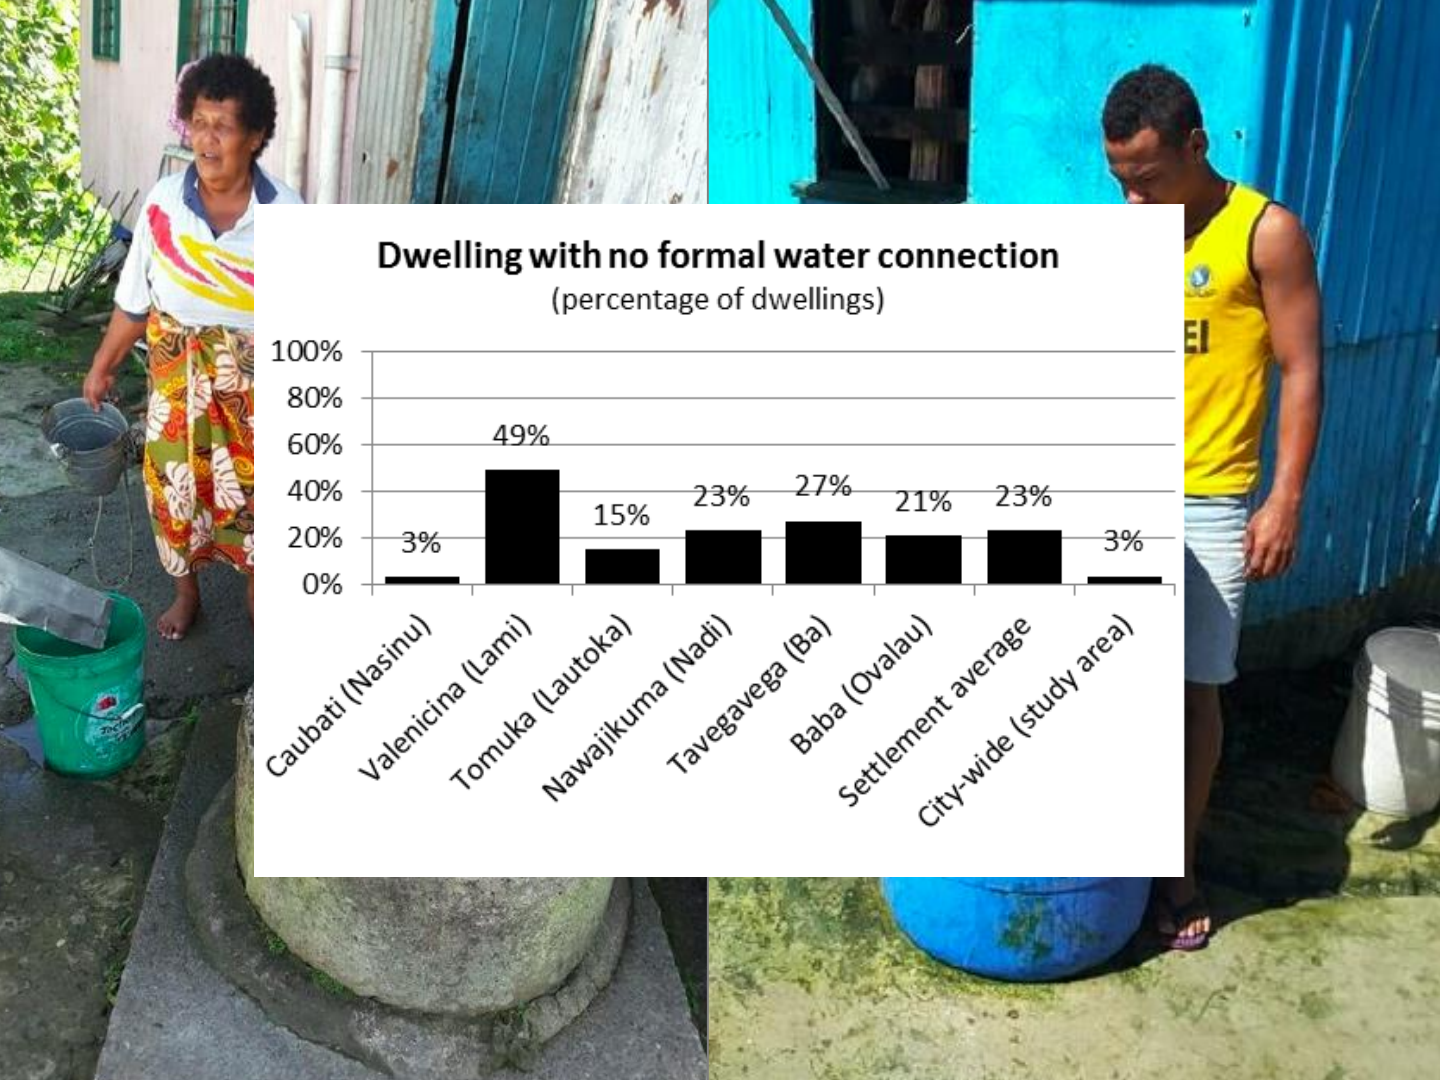

Cost of dwelling

(average cost (\$FJD))

Dwelling with no formal water connection
(percentage of dwellings)

Average weekly household income

(settlement household average)

Employment to population ratio

(ratio of workers to total population)

Settlement based economic activity
(Percentage of households engaging in activity)

Previous residence (percentage of head of household)
