

SENIOR & INTERMEDIATE PLANNERS

Auckland

4Sight is expanding - our teams are growing, our industry knowledge increasing, and the need for talented people vital. And although we are expanding right across the business, our Planning team is on the fast track to becoming one of the largest (and best) in the country, and consequently, we're on the lookout for an Intermediate and Senior Planner to join our Auckland office.

JOIN:

- One of New Zealand's largest Planning teams
- A business where people, clients and the environment come first
- A highly engaged and respected team who love working together
- A business that prides itself on diversity and flexibility

We're looking for Planners who are out of the box thinkers, driven, client-focused, have a keen interest in RMA planning, and most importantly, have a willingness to work collaboratively to deliver outstanding results. However, although we take our commitment to the business and the environment seriously, we still like to **have a lot of fun** along the way, so someone who enjoys a laugh would be ideal.

The successful candidates will have the opportunity to be involved in a mixture of projects across New Zealand, including undertaking planning due diligence, policy development, assisting local councils with processing resource consents, and acquiring resource consents for a range of development projects. Therefore, demonstrated experience in local government and private sector development projects is a must.

So if you're interested, have what it takes, and want to work for an established, but still growing New Zealand owned, award-winning consultancy, you can find out more and apply via our careers page www.4sight.consulting/careers.

We can't wait to hear from you and good luck!
