

Specialist Resource Consent Planner

Digital Signs are an exclusive importer of premium LED signs and billboards (www.DigitalSigns.co.nz).

Digital Advertising are a specialist operator of a digital billboard network throughout New Zealand (www.DigitalBillboardAdvertising.co.nz).

As part of the services we offer our clients, we apply for and obtain resource consents in all parts of New Zealand. We do between 100 – 150 consents per annum.

We have a vacancy in our Highbrook, Auckland, Head Office for a competent and experienced planner to become expert in the specialist field that we operate in. While this is for an initial 12 month contract we are open to negotiating something long term for the right person.

Full training will be given (as required). You will be able to hold your ground in an in-depth conversation on the best practise approach to planning, why the rules are the way they are, and where NZ urban planning is going.

You will not be required to lead hearings before Independent Hearing Commissioners as we have an in-house lawyer doing that.

The position could suit an established Planner wanting to specialise, or those with a specific interest in urban design and being involved in a change to make our environments more vibrant and more intensively used.

It is important you work well with others as our Team environment is important to us. You get a free day off on your birthday, you can work glide time (and some days from home). Some of your duties may extend from planning.

Please email a cover letter on why this role interests you, what experience you bring, what you are hoping to achieve in your career, and any questions you may have – Dave@DigitalSigns.co.nz.

Depending on your experience we are thinking in the \$60-80,000 salary range. Confidential inquiries to Dave Jaques (0274) 715 734.
