

## THE CATALYST GROUP

planning and environment

The Catalyst Group is looking for an experienced resource management practitioner to join our team.

We are a small, but a creative and high-performing team with expertise across policy, planning, biodiversity, water quality, land management, and conservation science. We work with an active network of collaborators including researchers, lawyers, scientists and other practitioners to deliver innovative, practical, evidence-driven solutions to complex natural resource management and conservation challenges across Aotearoa. Our clients include iwi, environmental groups, local and central government, and land owners. We would love to share our current projects with you and see how your skill-set will complement those programmes.

We seek expressions of interest from experienced experts who enjoy a fast-paced work environment, think outside of the box, and are focused on delivering positive outcomes for the environment and our clients. If you are at this stage in your career and are interested in what we have to offer, then check us out at [www.thecatalystgroup.co.nz](http://www.thecatalystgroup.co.nz).

Our company has offices in Palmerston North and Wellington, and works across the country. While we would prefer someone to join our Wellington team, we are open to your proposal for something different. We pride ourselves on providing a supportive and inclusive culture and flexible work environment.

So if you are keen to discuss this opportunity call Charlie Hopkins on 027 228 5292 or Greg Carlyon on 021 327 774 or express your interest at [enquiries@thecatalystgroup.co.nz](mailto:enquiries@thecatalystgroup.co.nz).
