

Planning Adviser

- Regional Policy Planning
- Making a positive difference
- Full time, permanent role

An internal promotion has created the opportunity to join the Environmental Planning Team.

You will work across a range of resource management topics including natural hazards and climate change. The team is making positive progress towards implementing a fully integrated second generation plan for Nelson.

Experience in regional policy planning working with the Resource Management Act is preferred. Sound written and verbal communication skills will enable you to actively engage with the Nelson community and present clear information and feedback to Council.

If you would like to see the impact of your work, this could be the role for you! In your cover letter, please describe how your experience and qualifications relate to the skills and knowledge needed in this role:

- experience in policy analysis and policy analysis development
- a customer focussed approach towards public consultation
- sound understanding of planning/resource management frameworks and practice in New Zealand
- project management experience
- a degree in Planning, Resource Management or a related field

In return, you will be rewarded with a competitive salary, generous leave provisions, some flexibility to work from home and ongoing professional development in an inclusive and supportive work environment.
